Working towards a greener planet

COMPANY PROFILE

From its modest beginnings in 1980 Firebird has grown to become a leading manufacturer of heating products in the UK and Ireland. Today the company is renowned for designing high quality, efficient heating products at its modern, highly automated factory.

All Firebird products are designed using the latest CAD-CAM technology. All of our products are designed to ensure robust performance over a long lifespan and are rigorously tested before being launched. Efficiency testing of our boilers to European standards is carried out at Gastec UK's certified laboratory and our oil condensing boilers are amongst the top performing boilers on the market.

Down through the years Firebird has enjoyed a string of industry firsts, including the first SEDBUK Band A rated Combi boiler.

Firebird strives to maximize production outputs and quality using the very latest in manufacturing techniques. Ongoing investment in new processes and equipment help to keep us keep ahead of the competition. Firebird only uses equipment with proven reliability and the flexibility to adapt to fast changing requirements of customers. We employ the latest CAD/CAM technology to design and program all component parts. Several high-speed TRUMPF punching machines allow us to fabricate a variety of high-quality sheet metal components. In recent years we have transformed our welding, folding and painting operations into fully automated systems using the state-of-the-art ABB robotic technology.

WARRANTY DETAILS /TERMS & CONDITIONS

OIL & BIOMASS BOILERS

Firebird provides 5yrs warranty from date of installation on the boiler shell and 2yrs warranty from date of purchase on all other parts, subject to the terms below.

SOLAR HOT WATER SYSTEMS

Firebird provides 5yrs warranty on the solar collectors from date of installation and 2yrs warranty from date of purchase on all other system parts, subject to conditions below:

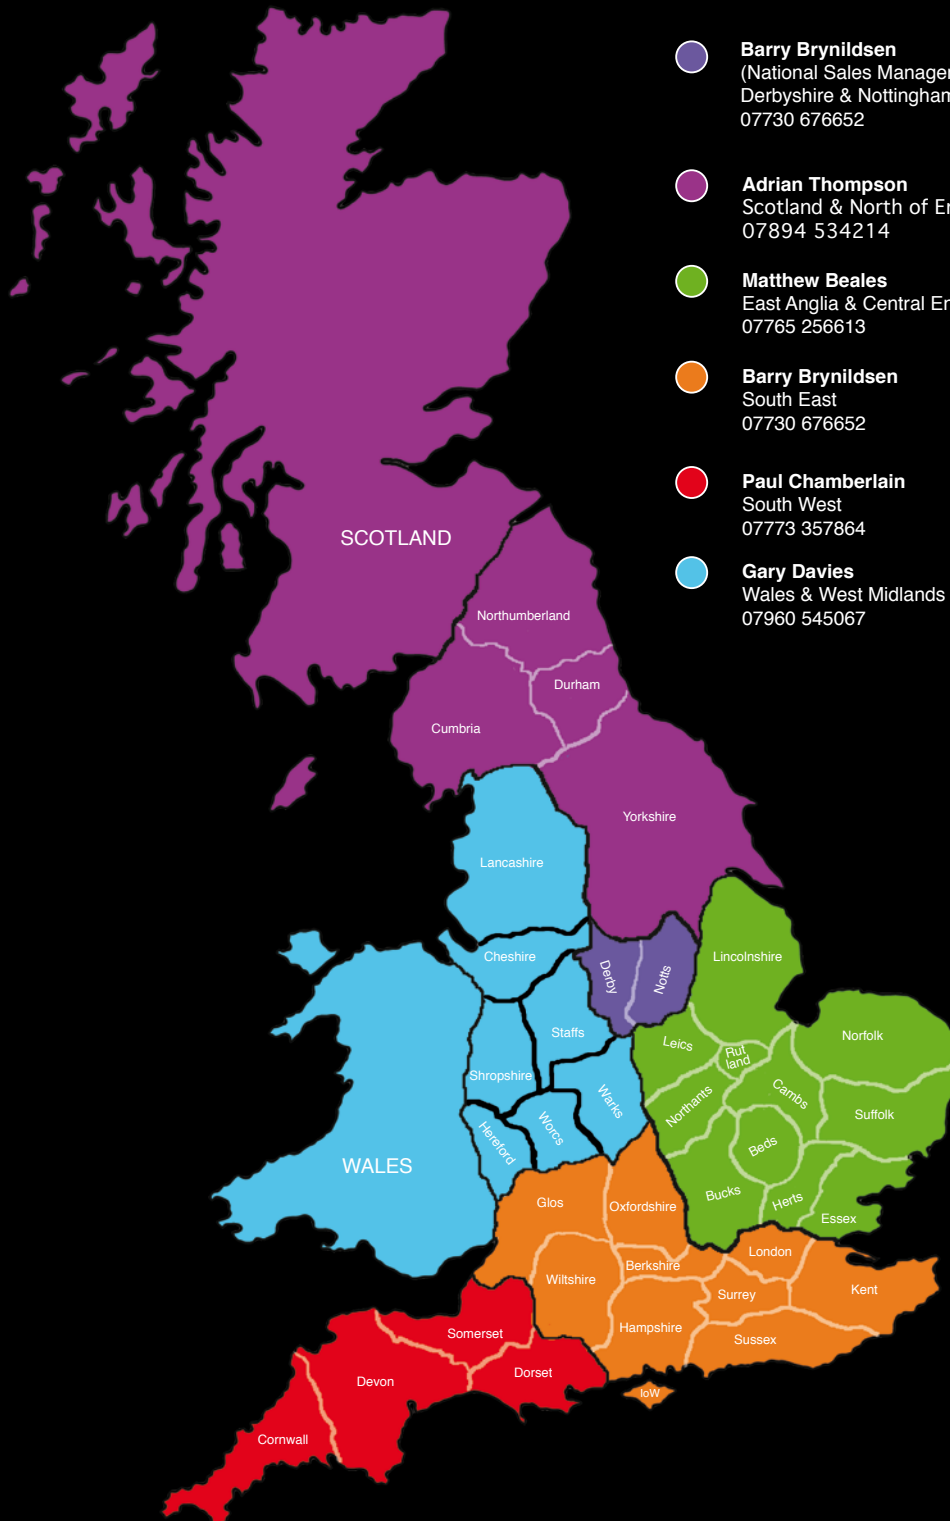

WARRANTY TERMS & CONDITIONS

Warranty implies that the product shall be free from defective parts or workmanship. Firebird will repair or replace, free of charge, goods or any part of such goods which are defective due to defective materials or workmanship, only provided that:

- Installation and commissioning of the product was in accordance with the Firebird installation manual and all relevant standards and codes of practice.
- Installation and commissioning was carried out by a competent qualified person using the correct installation and test equipment.
- A copy of the commissioning recorded was returned to Firebird within 30 days of the installation.
- Maintenance was carried out at the intervals stated in the installation manual.
- All claims under the warranty programme are within the above stated time limits.

- Firebird is satisfied that the defect in the goods is not due to wear and tear, accident, misuse, improper operation or neglect. Firebird will not accept any liability in respect of any defect occurring on the product due to lime-scale build-up and or low return water temperature.
- The goods have not been altered or used to carry loads or for any purpose other than those for which the goods are suitable as shown in the Firebird's literature.
- Firebird shall not be responsible for any delay in repairing or replacing defective parts, nor for any consequential loss sustained by the purchaser by reason of such defects, not for any damage of the goods while in transit or from the purchaser's premises or while in the possession of Firebird.
- The warranty programme extends to reasonable costs EXCEPT in the case of a 5 year warranty period whereby any valid claim made after 3 years will not include labour costs.
- Firebird's prior authorisation must be obtained before examination or repair of the product takes place.
- Firebird will examine all claims made under the warranty programme and for any claims that are deemed invalid, the costs incurred will be borne by the owner.
- Any defective part removed under any or all of the warranty programmes MUST be returned to Firebird.
