### **OIL FIRED RANGE COOKERS**

**WARMTH - TRADITIONAL COOKING - HOT WATER**

**FIREBIRD'S** oil fired range cookers allow for traditional cooking, perfect for your Sunday roast as well as your homemade favourites.

Our oil fired range cookers are available with a SEDBUK Band A, highly efficient, condensing boiler. Heat output to the room is equivalent to that of a large double radiator.

The incredible efficiency of the oil fired range cooker is due to the fact that Firebird has over 30 years experience in the heating industry. The condensing boiler is designed as a single boiler unit with two unique heat exchanger units. The additional surface area, aided by the unique patented baffle design, increases the amount of heat extracted from the combustion process and thus reduces the heat wasted to the atmosphere.

When installing a Firebird oil fired range cooker with a condensing boiler, you will be contributing to the reduction of global warming, as well as making considerable savings on your heating bills (up to 30% per annum in comparison to an oil fired range cooker with a conventional boiler).

All our range cookers are made out of cast iron with an attractive enamel finish. The oil fired range cooker with condensing boiler has the facility to control central heating and cook separately at the same time. The user friendly digital controller ensures optimum management.

We also manufacture cookers without an internal boiler.

## Features

- Highly efficient on fuel consumption.
- Robust cast iron design.
- Large main oven with even heat distribution.
- Warming oven.
- Heats up to 250°C.
- Cast iron lids ensure excellent heat retention.
- Attractive enamel finish.
- Ultra quiet operation.
- User friendly controller.

*Range cooker with condensing oil boiler:*

- Separate central heating and cooker control.
- SEDBUK Band A internal condensing boiler (steel).
- Available in 26kW and 35kW.

Print colours may not reflect actual colours, check with your local Firebird stockist.

## INSTALLATION

The range cooker should be installed on a solid floor or on a base of non-combustible material, capable of supporting the total weight of the cooker. Installation should always be carried out by an experienced and competent person and to the standards set out by the current Building Regulations and Electrical Wiring Regulations. Please refer to our installation manual for full details.

## SERVICING

In order to obtain the best efficiency, Firebird recommends that the cooker is serviced once a year by a competent, qualified engineer.

## WARRANTY

This Firebird product is designed and manufactured to give many years of trouble-free service. We offer a 5 year warranty on the cooker and boiler shell and 2 years warranty on all other parts, provided installation has occurred within 12 months from date of purchase. The 5 year cooker and boiler shell warranty consists of labour and parts for the first 3 years and parts only in years 4 and 5. The warranty is conditional on the cooker being commissioned and operated correctly (see instruction manual for terms & conditions).

## TECHNICAL SPECIFICATION

<b>BOILER MODEL</b>		<b>CR26</b>	<b>CR35</b>
Boiler Heat Output	kW Max. BTU/h	26 88,775	35 119,504
Efficiency (%)		93.7	93
<b>CONNECTIONS</b>
