

Firebird Phoenix Condensate Anti-Freeze Protection

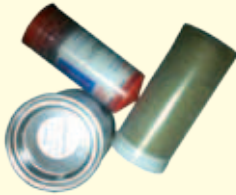

The Firebird Phoenix Condensate Anti-Freeze Protection is the only one pipe freeze pipe solution on the market. It is guaranteed to protect condensate pipes from freezing over and provides a low cost, efficient and effective solution to this problem.

- Universal fit for all boilers.
- Auto-thermostatically controlled.
- Easy installation.
- All fitting accessories supplied.
- Low power consumption.

Sales Code: ACC000PHX

Solar Paste Kit

The Firebird Solar Paste Kit contains solar paste for use on joints, 200g Hemp and also 80g Flax. The solar paste is the only officially tested paste on the market to withstand the high temperatures experienced within the solar system.

Sales Code: SOL000SPP

Firebird Weather Compensation Controller

This is a specially designed controller which compensates for outside and/or room temperatures. The flow temperature control happens through a motorised mixed valve.

- Frost protection function.
- Maximum plant temperature function.
- For outside weather and room temperatures.
- Easy to connect to room thermostat control sensors.
- Heating curve function.
- Temperature sensors.
- Easy to install and operate.

Sales Code: ACCWHTCTR

Firebird Cascading Controller

A controller suitable for wall mounting, complete with case and clamps for wiring. There is a backlit display and it has a multilingual function. It is very easy to use because of the clear menu structure.

- Modulating cascade boiler (max. 8 modules).
- Cooling with humidity control.
- Management of one heat pump.
- Automatic configuration of schemes.
- Remote management.
- Simplified wiring connections.

Sales Code: ACC000CTR

Working towards a greener planet

New Products & Accessories

Firebird has launched a range of transfer tanks that facilitate multi-system design and retrofits. These include the Junction Buffer 2-4 Box, with 24 litre capacity and the Solid Fuel Heat Exchanger, with 22 litre capacity. Both boxes are designed to accommodate multiple heating systems within a typical dwelling. They can also facilitate the integration of an additional system (i.e. stove) into an existing heating unit.

Firebird Solid Fuel Heat Exchanger

- Solid fuel/pressurised system integration.
- Easy to install, ground / wall mounted.
- Water volume storage to comply with regulations.
- White case finish.

Sales Code: ACCSFHEXH

Firebird Junction Buffer 2-4 Box

- For zone systems, under floor heating and multi-function systems.
- Capacity for integration of new system (e.g. air to water) to link into existing system.
- Reduce boiler cycling issues.
- 4mm steel shell, fully insulated and external green casing as standard.

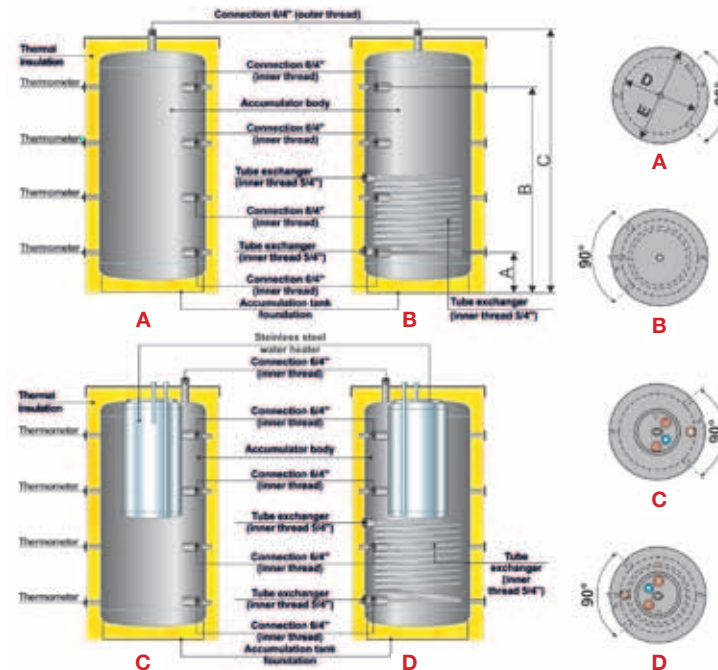

Sales Code: ACCJNCBOX

Firebird Insulated Tanks

Firebird have a new range of tanks to accommodate multi system installations. The tanks are produced to Firebird's highest quality standards and are all fitted with a 120mm insulation jacket.

Sales Codes: Range:

- A** SOL500TNK 500L Insulated Tank (direct)
- B** SOL500SCT 500L Insulated Tank (with single coil)
- C** SOL500ITK 500L Insulated Tank in Tank
- B** SOL800SCT 800L Insulated Tank (with single coil)
- D** SOL800ITK 800L Insulated Tank in Tank (with single coil)
- B** SOL1000CT 1000L Insulated Tank (with single coil)
- D** SOL1000TK 1000L insulated Tank in Tank (with single coil)

Firebird Magnetic Filter

This product is a magnetic dirt collector and air separator unit. The Firebird Magnetic Filter is designed to collect dirt that builds up in heating systems over time.

- Easy to install (vertically or horizontally) on the return line of the system.
- Easy to remove particles - simply open the blow down valve and allow the dirt to fall out of the bottom. Close on completion.
- Open air vent to release any trapped air that may have accumulated during filling or operation.
- Comes in 3/4" and 1" sizes.

Sales Codes:

- 3/4" - ACC075MGF
- 1" - ACC100MGF

Low Pressure Switch Kit

A Low Pressure Switch installed into an unvented heating system will prevent the boiler from firing, if the water pressure in the heating system drops below 0.2 bar pressure. A boiler firing with little or no pressure will damage the heating system or the boiler and potentially cause damage to the property. By installing the Firebird Low Pressure Switch you can avoid this risk.
